TIRE DECLARATION : Safety line 60J

Camsotech European R&D Centre NV., the approved technical office for the resilient and pneumatic tires produced by Camso, branded SOLIDEAL (produced at Camso Loadstar (PVT) Ltd, P.O. BOX 196, N° 4 Hunupitiya Road, Colombo 02, Sri Lanka, ISO 9001 certified, report N° 160002)

Represented by the Field Support Engineer EMEA(who has the authority to issue technical declarations) –hereby declares the following:

When to replace it?

- Undamaged resilient tires can be worn down to the 60-J line as indicated on the sidewall of the tire.
- Wearing beyond the 60-J line represents a safety hazard and can lead to unexpected tire failure as well as potential damage to the forklift truck.

Wearing indicator (Solideal Xtreme)

Camso 2015

Yours faithfully,

Matthias STEENHAUT

Field Support Engineer
