#### Certification of REACH compliance for tire articles

---

REACH regulation and the updated candidate list published by European Chemicals Agency (ECHA)

I guarantee that I am a duly authorized representative of my employer to grant the following certification:

1. Our company is **aware of its obligations as an article supplier under REACH regulation** and its annexes (among others HAP oils restrictions in Annex XVII) and fulfils all of these obligations.

2. Our company hereby certifies that all our tyre articles purchased by CAMSO do not **contain any of the Substances of Very High Concern listed in the Candidate List with a concentration above 0,1% (w/w).**

Please find hereafter the link of ECHA website which contains the last version of the Candidate List.

<http://echa.europa.eu/web/guest/candidate-list-table>

When the Candidate List is reviewed by ECHA in the future, I undertake to provide with sufficient information if Substances of Very High Concern in accordance with REACH (review of the "Candidate List") are present in our tires articles.
